

Firewall settings for system email and domains

If the verification emails do not arrive, the email from noreply@delta3.io will not reach the user's mailbox.

The email can either be in the user folder "Junk" or intercepted in the firewall or quarantine of the IT administration.

Therefore, the email address noreply@delta3.io must be entered as a confidential sender.

In addition, the following domains should also be entered in the positive list for the use of the services if necessary Firewall The xxx stands for the respective customer-specific instance, e.g.
<https://bmw.delta3.io/> for an instance of BMW.

- xxx.delta3.io
- xxx-mqtt.delta3.io
- xxx-brotermgt.delta3.io
- xxx-cloud.delta3.io
- www.delta3.io
