

## Registration of delta3 | Apps as Player in Devices

The registration of additional apps as players is done on the page xxx-devices.delta3.io. The xxx stands for the respective customer-specific instance, e.g. <https://bmw.delta3.io/> for an instance of BMW. After logging in, switch to the "Player" tab.

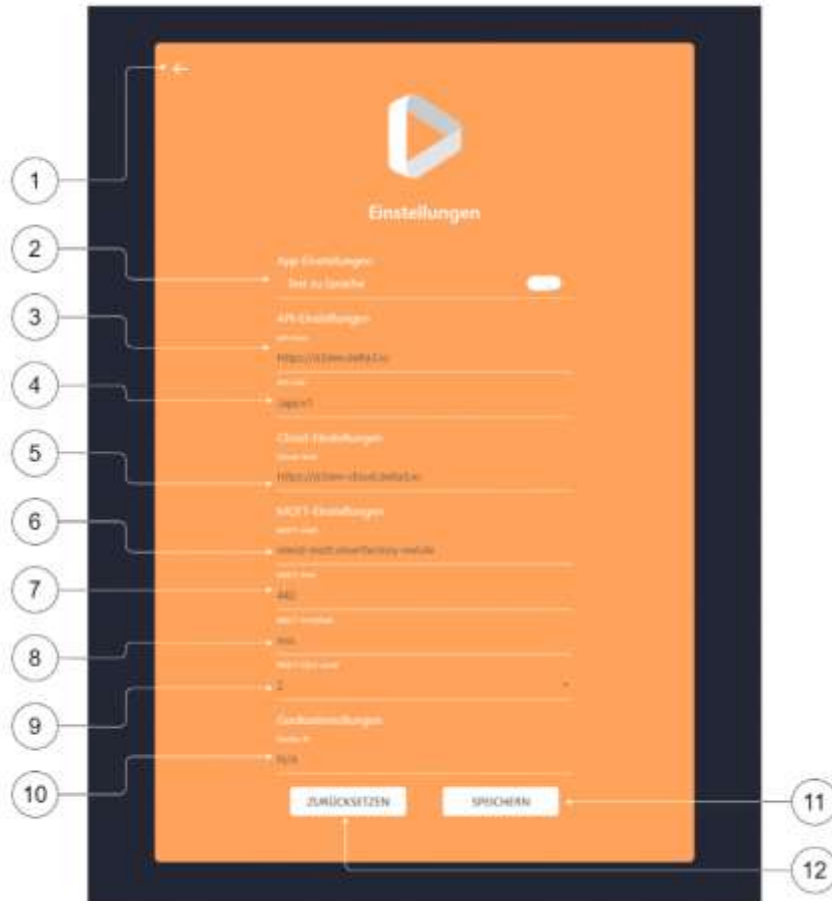

Select the "Add Player" button on the right side.

The DeviceID/PlayerID is located in the settings of the APP in the start screen.

Open the settings in the APP via the cogwheel:

Transfer the information below point 10 "DeviceID/Device ID" into the corresponding field in the web application.

The screenshot shows the 'Einstellungen' (Settings) page of a web application. The interface is orange with a dark blue header and footer. The settings are organized into sections: 'App-Einstellungen', 'API-Einstellungen', 'Cloud-Einstellungen', 'MIDI-Einstellungen', and 'Systemeinstellungen'. Each section contains various configuration options, some with dropdown menus and others with text input fields. At the bottom, there are two buttons: 'ZURÜCKSETZEN' (Reset) and 'SPEICHERN' (Save). Numbered callouts (1-12) point to specific elements: 1 points to the back arrow, 2 to the 'App-Einstellungen' section, 3 to the 'API-Einstellungen' section, 4 to the 'API-URL' field, 5 to the 'API-Header' field, 6 to the 'API-Header' field, 7 to the 'API-Header' field, 8 to the 'API-Header' field, 9 to the 'API-Header' field, 10 to the 'DeviceID/Device ID' field, 11 to the 'SPEICHERN' button, and 12 to the 'ZURÜCKSETZEN' button.

After saving, the device is available as a player for the device output.
